

SECTION 11

11.13 ALLOWABLE USES OF NONPOTABLE WATER:

The use of nonpotable water is allowed only after approval has been granted by Denver Water through its review procedure. Approval will be given on a site specific basis. Considerations in approving a use include, but are not limited to, potential human contact, surface runoff conditions, availability of a nonpotable source. The use of nonpotable water is allowed for the following purposes with prior Denver Water approval:

- A. Irrigation of greenbelt areas, parks, roadway medians, golf courses, landscape areas adjacent to industrial buildings and residential landscape areas.
- B. Industrial uses such as cooling towers, pump packing water and boiler water make-up.
- C. Commercial uses such as nursery irrigation and sod farming.
- D. Construction uses such as moisture addition in soil compaction or mortar water for block laying.
